Application to designate a neighbourhood area**

**Town and Country Planning Act 1990
Neighbourhood Planning (General) Regulations 2012**

These will be the 'relevant body' in the area – a term used in the regulations for neighbourhood planning. By completing this form you confirm that you represent the parish council and give us permission to publish the form on the local authority's website.

What happens next?

If the application is for a whole parish area, the local planning authority must designate the area and, upon receipt of the application form and supporting documentation, will issue a designation statement at the earliest opportunity.

If the application relates to more than one parish area or a smaller area within a parish, the council must publicise the area application on its website and in such other manner as they consider is likely to bring it to the attention of people who live, work or carry out business in the area to which the application relates. There will be a period of not less than four weeks of public consultation when the relevant council will invite comments on the application.

The relevant council will decide whether to designate the neighbourhood area as soon as possible after the consultation ends. To do this it will consider:

- if the application is valid. A valid application will:
 - Have a map showing the area.
 - Have a statement explaining why it is considered an appropriate neighbourhood area.
 - Be from the 'relevant body'.
- All representations made during the consultation.
- Whether the proposed area is appropriate and does not overlap with other areas – only one neighbourhood plan is permitted per neighbourhood area.

The relevant council may modify the application with the parish's consent if it is considered the neighbourhood area is not appropriate.

Designation of the area

The relevant council will notify the parish and publish decisions on its website and within the neighbourhood area. Reasons will be given if the application is not successful within the decision document.
